OVERWATCH Wildfire delineation video on YouTube

Our partners at Ithaca have provided us with excellent materials, from which we've created an explanatory video detailing the "Wildfire Delineation process" in OVERWATCH.

OVERWATCH @ "Innovation and Technological Modernization in the Army" event organized by CEMTEX

Our partner ISQ participated in the Army's technological exhibition, "Innovation and Technological Modernization in the Army".

Organized by the Army's Center for Experimentation and Technological Modernization (CEMTEX), this initiative welcomes companies and institutions belonging to the Defense Technological and Industrial Base, including research centers of the National Scientific and Technological System, with the aim of showcasing initiatives and research, development, and innovation projects relevant to the Defense and Security sector.

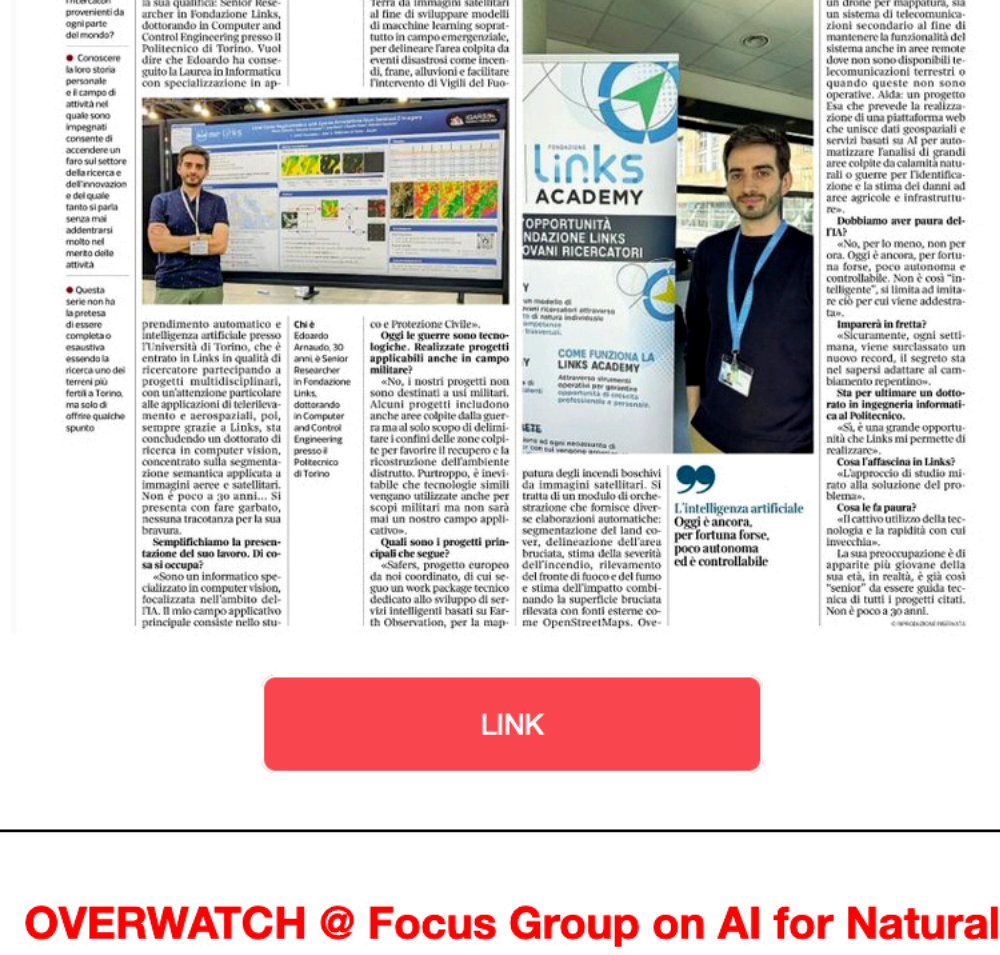

Given the focus of the event, ISQ presented, in the exhibition area, some technologies with potential applications at the Army level.

One of the technologies involves additive manufacturing of materials, including design, simulation, production, and post-processing, AR VR applications for training and on-site user support, developments of the Scorpens project (EDA), and the OVERWATCH project geared towards use in natural disasters by civil protection and firefighter bodies, which in the Portuguese case also benefit from the valuable assistance of the armed forces.

OVERWATCH on an Italian newspaper

Edoardo Arnaudo from LINKS Foundation, one of the team members of our project, has given an interview for a newspaper in the city of Turin (Italy), where he talks about his journey and also discusses the Overwatch project.

OVERWATCH @ Focus Group on AI for Natural Disaster Management (FG-AI4NDM)

Vanina Fissore from Ithaca Srl presented the Overwatch project at the 12th "Focus Group on AI for Natural Disaster Management" Meeting and Workshop 2024 (FG-AI4NDM, ITU/WMO/UNEP). OVERWATCH has been selected as a use case in the Topic Group on "AI for Multi-hazard Communications Technologies".

The event took place from March 13th to 15th, 2024, in Maryland, United States.
